Team 12 - Marks & Feedback

Summary.md	Miss ing 0%	Low Qua lity 50%	OK 70%	Good 80%	Outsta nding 100%
Component	**0**	**1**	**2**	**3**	**4**
Clearly explain *what* you are planning to build					4
Clearly explain *who* your target users are					4
Clearly explain *why* the product you are planning to build will be useful to the target users					4
Clearly explain *how* you are going to build it				3	
Overall quality of deliverables					4
Overall insight				3	

Collaboration.md	Miss- ing 0%	Low Qua lity 50%	OK 70%	Good 80%	Outsta nding 100%
Component	**0**	**1**	**2**	**3**	**4**
Reasonable records of meetings (when, who, minutes)					4
Reasonable plans for future meetings				3	
Reasonable roles for each team member				3	
Reasonable decision making proposal					4
Reasonable github/git collaboration proposal					4

Feedback

Missing info:
- Technical challenges
- How are you going to build it?
  - Please speak geek.
  - Mention technologies used

Report needs more detail about:
- Value proposition
  - Report should discuss in more details the value proposition of the add-on
  - Maybe mention a few personas to help explain what kind of problems are faced by your target users
- Roles assigned to each team member
  - You listed strengths & skills, but who was assigned what?
  - I know it's too early to assign exact tasks, but each person knows their general area of strength (backend, frontend, UX/UI only etc.)
- Future meetings
  - This part should mention the backlog and how it will be divided into sprints

Project idea:
- The idea itself is very useful
- Also, please consider notifying the user when a duplicate tab exists. Silently preventing duplicates from opening up or switching to the existing open tab might not be ideal.
